FISHI-Fresh Island Seafood prides ourselves on stocking only quality products, we have sourced the best local product and the finest in Australia. Matt being a fisherman himself understands more than anyone that well treated produce from the moment it lands in the boat needs to be cared for and this is why the Great Barrier Reef Marine Park Authority (GBRMPA) has recently named FISHI as 'Reef Guardians'. This recognises our working practises as highly sustainable and correct. We stock only a few select imported items that are not available within Australia, whilst supporting a sustainable fishery in Australia, there are such things as clams and black caviar which are unavailable. Although we are Seafood Specialists we have also discovered the need for consolidating meat, deli goods and fresh fruit and vegetables, so we have teamed up with the two finest local producers that have the same value service that we provide. In the last month we have also had our prawn supplier start unloading our local prawn, bug and scallop direct from the trawler to us.
